Research

ongoing projects.

- https://hydro-wiki.de/

for remediation, flood control, retention and recharge mangagment.

# **Research Topics**

### Hydrology and Water Quality

Processes studies and assessment of water quality, flow and solute transport modeling in different environmenal compartments. Tracers, hydrochemical and compartmental modeling, and other models of environmental flow dynamics are derived from hydrochemical and isotope data.

Master Theses in Water Engineering

Groundwater Recharge of Samos

Extreme flooding on Samos Island

Greece - Causes, Mechanisms and

 Impact of Mega-Droughts on Rivers, Springs and Groundwater on Samos

Island, Greece - Response to Extremes

**Theses in Environmental Engineering** 

Several master theses can be realized in

### We work continuously on developing new aspects of hydrological engineering.

**Hydrological Engineering** 

- Water Engineering Solutions -Enhanced Nutrient Recycling in Hydrological Basins
- Water Engineering Solutions -Adaptive Drainage Systems for a **Changing Environment**
- Water Engineering Solutions -Adaptive Management of Alluvial Aquifers

### **Bachelor Theses for Civil and Environmental Engineers**

Please contact the laboratory of hydrology for further information.

- Hydrochemical Processes associated with groundwater salinization on Samos Island, Greece
- Hydrochemical and isotopic fingerprints of salinization types
- Hydrochemical analysis of surface groundwater interaction of a lowland river

Mitigation

## **Enhanced Monitoring**

Hydrological Modeling

The research addresses new monitoring and modeling approaches, improved monitoring devices and techniques as well as their efficient operation, methods for data analysis and programming including AI.

## Secure and Sustainable Access to Water

Modeling and design of ecohydrological systems The objective is to quantify environmental and socio-economic factors and derive indicators for access to water.
