2024/06/02 08:29 1/2 Research

### Research

### **Bachelor and Master Theses in Water Engineering**

### **Master Theses in Environmental Engineering**

Several master theses can be realized in ongoing projects.

- Groundwater Recharge of Samos Island, Greece - Factors and Response to Extremes
- Extreme flooding on Samos Island Greece - Causes, Mechanisms and Mitigation
- Impact of Mega-Droughts on Rivers, Springs and Groundwater on Samos, Greece

## **Bachelor Theses for Civil and Environmental Engineers**

Please contact the laboratory of hydrology for further information.

- Hydrochemical Processes associated with groundwater salinization on Samos Island, Greece
- Hydrochemical and isotopic fingerprints of salinization types
- Hydrochemical analysis of surface groundwater interaction of a lowland river

# **Research Topics**

#### **Hydrology and Water Quality**

Processes studies and assessment of water quality, flow and solute transport modeling in different environmenal compartments. Tracers, hydrochemical and compartmental modeling, and other models of environmental flow dynamics are derived from hydrochemical and isotope data.

### **Enhanced Monitoring**

The research addresses new monitoring and modeling approaches, improved monitoring devices and techniques as well as their efficient operation, methods for data analysis and programming including AI.

### **Hydrological Modeling**

for remediation, flood control, retention and recharge mangagment.

#### **Hydrological Engineering**

We work continuously on developing new aspects of hydrological engineering.

- Water Engineering Solutions -Enhanced Nutrient Recycling in Hydrological Basins
- · Water Engineering Solutions -Adaptive Drainage Systems for a Changing Environment
- Water Engineering Solutions -Adaptive Management of Alluvial Aquifers

#### Secure and Sustainable Access to Water

Modeling and design of ecohydrological systems The objective is to quantify environmental and socio-economic factors and derive indicators for access to water.
